CAREER OBJECTIVE

Computer Science graduate with hands-on experience in AI-powered application development, web development, and software engineering. Skilled in Flutter, Python, JavaScript, Firebase, and modern AI tools, with experience building intelligent applications and real-world event technology solutions. Passionate about AI, automation, and scalable software systems, with a strong interest in creating impactful digital products.

TECHNICAL SKILLS

- **Programming:** C, C++, Python, JavaScript, SQL
- **AI & LLM Tools:** OpenAI API, Gemini API, Claude Code, ChatGPT, Prompt Engineering, AI Workflows
- **Mobile Development:** Flutter, Firebase
- **Web Development:** HTML, CSS, JavaScript, React, REST APIs
- **Tools & Platforms:** Git, GitHub, Firebase, Netlify, VS Code

EXPERIENCE

Website Developer & Graphic Designer Intern

June 2026 – July 2026

Dhan Enterprises & Suprabha Trust | Hyderabad, Telangana

- Developed and maintained the official website for IRE Expo 2026.
- Designed event banners, certificates, posters, social media creatives, and marketing materials.
- Worked directly with the Chief Revenue Officer (CRO) to deliver technical and creative solutions under strict deadlines.
- Assisted in digital marketing campaigns, website updates, and promotional activities.
- Supported the planning and successful execution of IRE Expo 2026 by handling website and design requirements.
- Managed multiple responsibilities independently across web development, graphic design, and event technology.

PROJECTS

LifeOS – Personal Productivity & Digital Life Management System

Personal Project | Flutter, Firebase

Designed and developed an AI-powered productivity application using Flutter and Firebase. Built intelligent task management, journaling, habit tracking, reminders, contextual AI assistance, and scalable application architecture focused on improving daily productivity and organization..

Twinkle – AI Agent Workflows, Contextual Prompting, Domain Routing.

Personal Project | Python, HTML, CSS, JavaScript, Firebase, Gemini API

Developed an AI-powered personal assistant using Python, JavaScript, Firebase, and the Gemini API. Implemented contextual memory, multi-chat architecture, secure authentication, AI workflows, API integration, and personalized assistance across productivity, coding, research, and planning.

EDUCATION

Bhavan's Vivekananda College of Arts, Science and Humanities

B.Sc in Computer Science

Hyderabad, TG
2023 – 2026

Sri Chaitanya Junior Kalasala

Intermediate (MPC)

Hyderabad, TG
2021 – 2023

Sai Krishnaveni High School

SSC

Hyderabad, TG
Until 2021

CERTIFICATIONS & LEARNING

• Anthropic Skilljar – AI & Prompt Engineering Learning Path

Learning Generative AI concepts, prompt engineering, LLM workflows, and responsible AI applications.
